Action D.2: Project website (Start Date: October 2013- End Date: September 2016)

A web of the project was created on October 2013 (in English and Spanish) (and updated continuously during the whole project) with project information and a private area for all the partners www.adnatur.com and also, with links to the LIFE+ Program web. (Deliverable D.D.2.1).

- Moreover a link of the ADNATUR webpage was included in all partners website (**Deliverable D.D.2.2**).
- The website has its own domain .com.
- The website developed includes general information about the project and its objectives, actions, advances, press releases, dissemination actions, news, events, as well as a brief description of the partners involved.
- The website also offers two sections with related news and events and public documents.
- The “Overview” section offers detailed information about the objectives of the project, the actions and all the means involved.

- In the private area are project documents, deliverables, information meetings, project reports and all relevant information
- In News and events it has been actualized all the communication activities carried out by partners.

Moreover, some actions that were not foreseen initially have been carried out:

- Translation to Spanish Language
- Linked up of the on-line newsletter to the webpage in order to increase the number of visits and increase the visibility of ADNATUR.

- Networking section (including info gathered from other LIFE projects. Table with LIFE projects collected with a document with the main information of that project: contacts, objectives and expected results. In this new section it has been also linked to the database developed by AITEX and ENEA in which more information of the project could be seen as for example the common issues with ADNATUR project.
- In the Project Information Section it has been included the technical progresses of each action by clicking each action.
- All these modification and improvement have been done both in English and Spanish.
- It is important to mention that ADNATUR website has received some attacks from hackers during the last two years. The last attack has forced to develop the website from the beginning as it was everything deleted
